INDEX TO GEOPHYSICAL ABSTRACTS 100–103

JANUARY–DECEMBER 1940

Compiled by V. E. CLEVER

A

	No.	Abst.
Alder, R. L., Improved counting-rate meter (5)	101	5526
Alpin, L. M., Method of electrical coring, Russian patent 56,025 (10)	102	5738
—— Method of electrical coring of cased boreholes, Russian patent 56,026 (10)	102	5739
American Geophysical Union, Special basement-surface contour map of eastern and central United States (9)	101	5559
American Institute of Mining and Metallurgical Engineers, Transactions: Petroleum development and technology, 1939 (9)	100	5421
American Petroleum Institute, Finding and producing oil (9)	102	5701
Amirkhanov, K. I., Thermoelectric thermometer for measuring at great depths (6)	103	5819
Angst, Karl, Apparatus for extracting gas, in particular atmospheric air, from the soil, French patent 848,600 (10)	101	5601
Askania-Werke Aktiengesellschaft, Improvements in or relating to gravity meters, British patent 513,654 (10)	100	5452
Athy, L. F., Method of logging boreholes, U. S. patent 2,199,367 (10)	102	5711
—— Method of electrical logging, U. S. patent 2,207,280 (10)	102	5731
—— Seismic method of logging boreholes, U. S. patent 2,207,281 (10)	102	5732
Atlas-Werke Aktiengesellschaft, Depth-measuring apparatus, U. S. patent 2,179,509 (10)	100	5443
Atwill, E. R., Significant developments in California, 1939 (8)	102	5681

B

Balensiefer, E., Investigations concerning ground disturbance at Sylt (3)	103	5777
Barnes, R. M., Twenty years of petroleum geology in California (8)	103	5830
Barret, W. M., Electric geological apparatus, Canadian patent 386,705 (10)	102	5734
Bartels, J., The 3-hour-range index measuring geomagnetic activity (2)	100	5314
—— Main features of daily magnetic variations at Sitka, Cheltenham, Tucson, San Juan, Honolulu, Huancayo, and Watheroo (2)	100	5315
—— Geomagnetic tides in horizontal intensity at Huancayo, part 1 (2)	103	5755
—— Geomagnetic 3-hour-range indices for the years 1938 and 1939 (2)	103	5756
—— Solar radiation and geomagnetism (2)	103	5757
—— Sun radiation and earth magnetism (2)	103	5758
Bashlykin, I. I., Results of electrical logging in the coal fields of Dombarovsk and Bredinsk (4)	103	5803
Baudisch, Oscar, Geochemistry of the Saratoga basin—The radioactivity of Saratoga Spring waters and rocks (5)	100	5387
Bays, G. S., Gas mapping, U. S. patent 2,165,440 (10)	100	5437
Becker, Ludwig, Movement of continents and the Köppen-Wegener pole-curve (7)	100	5397
Beers, R. F., Velocity stratification as an aid to correlation (3)	101	5486
Bein, G., Magnetic measurements in the iron-ore fields of the eastern Sudeten district (2)	101	5466
Bell, K. G., Radioactivity of sedimentary rocks and associated petroleum (5)	103	5813
Benfield, A. E., Terrestrial heat flow in Great Britain (6)	101	5532
Bentz, A., Petroleum and governmental geophysical survey in Germany (8)	101	5545

	No.	Abst.
Bereskin, M. A., Some data concerning physical properties of Donbass coals (8)	102	5689
Bignell, L. G. E., Sound waves used to take potential (3)	101	5487
—— Exploration for new oil fields stimulated by soil analysis (7)	101	5538
Bilinsky, Solomon, Exploration by incremental wave distortion, U. S. patent 2,177,346 (10)	101	5564
Birch, Francis, α–γ transformation of iron at high pressure, and problem of earth's magnetism (2)	102	5611
—— The thermal conductivity of rocks and its dependence upon temperature and composition (6)	103	5820
Blake, Archie, Mathematical problems in seismology (3)	100	5329
Blau, L. W., Apparatus for recording earth-current transients, U. S. patent 2,079,103 (10)	100	5426
—— Apparatus for comparing a plurality of oscillatory systems, U. S. patent 2,148,678 (10)	100	5431
—— Use of high frequencies in measuring change in electrical impedance, U. S. patent 2,148,679 (10)	100	5432
—— Feedover device, U. S. patent, 2,180,949 (10)	101	5565
—— Multiple-component gravity balance, U. S. patent 2,185,582 (10)	101	5571
—— Electric earth transients in geophysical prospecting, U. S. patent 2,202,369 (10)	102	5715
Blondeau, E. E., Shallow resistivity survey at South Elton, La. (4)	100	5374
Boaga, Giovanni, Twenty-seven years of international gravimetric activity (1)	102	5602
Bogdanov, A. I., Graphical method of interpreting some types of three-layer curves by vertical electric resistivity measurements (4)	102	5649
Bolidens Gruvaktiebolag, Apparatus for determining gravity, U. S. patent 2,179,892 (10)	100	5445
—— Method of measuring gravity, U. S. patent 2,182,298 (10)	100	5447
—— Gravity-measuring apparatus, Canadian patent 390,487 (10)	103	5871
Bonetti, Alberto, Mineral possibilities in the Province of Messina (8)	102	5682
Born, W. T., Geophysical application in the production of oil (8)	101	5546
Bornhauser, Max, Three new interior salt domes in northeast Louisiana (1)	101	5454
Bossolasco, Mario, Concerning geoelectric prospecting on volcanoes (4)	102	5650
—— Mineral possibilities in the Province of Messina (8)	102	5682
Boucher, F. G., Multiple gravity meter, U. S. patent 2,183,115 (10)	101	5566
Bowie, W., Gravity anomaly an important factor in earth science (1)	102	5603
Brant, Arthur, Geophysical investigation at Steeprock Lake (2, 4)	102	5612
—— Geophysical work at Steeprock Lake, 1938–39 (2, 4)	103	5759
Brewer, A. K., Geochemistry of the Saratoga basin—The radioactivity of Saratoga Spring waters and rocks (5)	100	5387
Breyer, Friedrich, Topographic reduction of plumb-line deviations at Nanga Parbat with the aid of a diagram (1)	100	5299
Brockamp, B., Application of geophysics in the Salzgitter region (1, 3, 4)	103	5743
Browne, B. C., Comparison of the acceleration due to gravity at the National Laboratory, Teddington, and the Bureau of Standards, Washington, D. C. (1)	102	5604
Brundin, Nils, Method of locating metals and minerals in the ground, U. S. patent 2,158,980 (10)	100	5435
Bryan, A. B., Apparatus for comparing a plurality of oscillatory systems, U. S. patent 2,148,678 (10)	100	5431
—— Time-lines recording apparatus, U. S. patent 2,184,953 (10)	103	5854
Bullard, E. C., Submarine geology (3)	100	5330
—— Heat flow in South Africa (5)	101	5533
—— Comparison of the acceleration due to gravity at the National Laboratory, Teddington, and the Bureau of Standards, Washington, D. C. (1)	102	5604
—— Geophysical study of submarine geology (3)	103	5778
Bullen, K. E., On Rayleigh waves across the Pacific Ocean (3)	101	5488
—— Theoretical traveltimes of the phases *PP*, *PPP*, *PS*, *PPS*, *SS*, *PSS*, and *SSS* (3)	101	5489
—— The problem of the earth's density variation (1)	103	5744
—— The Wairarapa earthquake of August 5, 1917 (3)	103	5779
Bungers, Rolf, The superposition of two waves of different direction of origin (3)	100	5331
Burger, A., Potsdam's magnetic character numbers (2)	103	5760
Burmeister, F., On determining the temperature of an oscillating magnet (2)	103	5761
Burt, C. E., Arrangement for taking samples from the side walls of a borehole, German patent 678,677 (10)	101	5594
Butler, A. J., Magnetic survey over hematite ore, Newton mine, Furness (2)	102	5616

	No.	Abst.
Büttner, Kurt, Investigations concerning ground disturbance at Sylt (3)	103	5777
Byerly, Perry, Speeds of seismic waves and earth structure in central California (3)	100	5332
—— Seismicity of the northern Pacific coast of the United States (3)	101	5490

C

Cagniard, Louis, Reflection and refraction of propagating seismic waves (9)	102	5700
California Mining Journal (editorial), United States Geological Survey using geophysics in search for Plumas gold (8)	102	5694
Caloi, Pietro, Graphic methods for determining epicentric conditions of near earthquakes (3)	100	5333
Campbell, F. F., Dip reflections on two faults in the Gulf coast (2)	100	5334
Canadian Mining and Metallurgical Bulletin (editorial), Radioactive standards (5)	102	5669
Canadian polar-year expeditions, 1932–33—Terrestrial magnetism, earth currents, aurora borealis (vol. 2) (9)	103	5843
Chapman, S., The statistical determination of lunar daily variations in geomagnetic and meteorological elements (2)	103	5762
Clark, Harry, The thermal conductivity of rocks and its dependence upon temperature and composition (6)	103	5820
Closs, H., On magnetic and gravimetrical investigations in the Kaiserstuhl (1, 2)	101	5460
—— Petroleum and governmental geophysical survey in Germany (8)	101	5545
Cloud, R. T., Electrical logging of earth formations, U. S. patent 2,206,863 (10)	102	5723
—— Electrical logging of earth formations, U. S. patent 2,206,864 (10)	102	5724
—— Seismic surveying system, Canadian patent 387,159 (10)	102	5735
—— Attenuator, U. S. patent 2,193,620 (10)	103	5856
—— Method and apparatus for electric logging, U. S. patent 2,210,795 (10)	103	5861
Cohen, E. R., Geologic investigations by deep drilling southeast of the village of Sultanci, near Provadia, in northeastern Bulgaria, according to geophysical information (8)	101	5547
Collie, C. H., Mode of action of a Geiger-Müller counter (5)	102	5665
Compagnie Générale de Géophysique, Improvements of methods and apparatus for electrical prospecting of subsoil, French patent 850,501 (10)	103	5875
Continental Oil Co., Method of logging boreholes, U. S. patent 2,199,367 (10)	102	5711
—— Method of electrical logging, U. S. patent 2,207,280 (10)	102	5731
—— Seismic method of logging boreholes, U. S. patent 2,207,281 (10)	102	5732
Cooper, C. W., Logging device, U. S. patent 2,156,052 (10)	100	5434
Cope, S. T., A mobile seismic-recording unit (3)	100	5353
Coulomb, J., Diffraction of a perturbation near a caustic—Application to P′ waves (3)	102	5624
Current, Eugene, Comparison of geophysics and other exploration (7)	100	5398
Currie, B. W., Earth currents (4)	102	5651

D

Dakhnov, V. H., Gravimeter, Russian patent 56,427 (10)	102	5742
Dakhnov, V. N., Earth currents and ways of studying them in connection with prospecting for ores (4)	102	5652
—— On the nature of the natural electric fields in coal deposits (4)	103	5804
Dalmasso, Fernando, The Palermo earthquake of January 15, 1940 (3)	102	5625
Dauvillier, Alexandre, The origin of terrestrial magnetism (2)	102	5613
DeGolyer, Everette, Future position of petroleum geology in the oil industry (7)	103	5831
Demenitskaia, R. M., Prospects of seismic survey by the method of refracted waves in the region of the Ust-Eniseisk port (3)	100	5335
Deussen, Alexander, Correlation of surface and subsurface formations in two typical sections of the Gulf coast of Texas (4)	100	5375
Diakonov, D. I., Conditions for rational application of logging in oil fields and methods of interpreting the diagrams obtained by logging (4)	103	5805
Dix, C. H., Refraction and reflection of seismic waves, part 2 (3)	100	5336
—— Derivatives of traveltime curves (3)	101	5491
Doll, H. G., Method and arrangement for determining the direction and the value of the dip of beds cut by a borehole, U. S. patent 2,176,169 (10)	100	5442
—— Method and arrangement for determining the direction of the strike and angle of dip of the layers cut by a borehole, German patent 681,396 (10)	101	5596

	No.	Abst.
Dominion Obervatory, New Zealand seismological reports (3)	103	5791
Dunn, T. H., Soil-gas analysis, U. S. patent 2,212,681 (10)	103	5868
Duvall, C. R., Magnetic declination in the Pacific from observations by the *Galilee* and *Carnegie* (2)	100	5316

E

Earthquake notes, J. H. Nelson, editor (9)	101	5560
Easton, H. D., Mississippi oil discovery indicates vast new reserve (8)	100	5411
Eblé, Louis, Values of magnetic elements at the Chambon-la-Forêt (Loiret) Observatory on January 1, 1940 (2)	101	5467
—— The magnetic disturbance of March 24, 1940 (2)	103	5763
Eby, J. B., Recent progress in geophysical, geochemical, and electrical-prospecting methods for petroleum (8)	102	5684
Eckhardt, E. A., Gravity method produces results at low cost (1)	101	5455
—— Some reflections on seismic prospecting (3)	102	5626
—— A brief history of the gravity method of prospecting for oil (1)	103	5745
—— Geophysics (8)	103	5832
—— Partnership between geology and geophysics in prospecting for oil (8)	103	5833
Ehmann, O., Geiger-counter amplifier with high resolving power (5)	103	5814
Elliott, D. W., Locating water strata in oil wells, U. S. patent 2,167,066 (10)	100	5438
Elliott, R. D., Recording apparatus and method, U. S. patent 2,170,857 (10)	101	5563
Ellis, L. G., Electrical-prospecting apparatus, U. S. patent 2,197,493 (10)	103	5857
Engineering and Mining Journal (editorial), Geophysical work at Steep Rock Lake (8)	102	5686
Engineering Research Corporation, Electric geological apparatus, Canadian patent 386,705 (10)	102	5734
Ennis, G. H., Apparatus for determining pressure and temperature in a well, U. S. patent 2,190,260 (10)	101	5575
—— Method of and apparatus for locating water leakages into wells, U. S. patent 2,184,338 (10)	103	5853
Evans, J. F., Correlating gravity maximum with oil structure in Ramsey field (1)	100	5300
Evans, R. D., Improved counting-rate meter (5)	101	5526
—— Direct-reading counting-rate ratio meter (5)	101	5527
Evans, W. T., Borehole exploring apparatus, U. S. patent 2,197,571 (10)	102	5709
Evjen, H. M., Geophysical-exploration method, Canadian patent 390,989 (10)	103	5873
—— Geophysical-exploration method, Canadian patent 390,990 (10)	103	5874

F

Fanselau, G., Preliminary results of terrestrial magnetic observations in Niemegk in 1939 (2)	103	5764
Farnham, F. C., The seismic method for determining depths to bedrock as applied in the Lowell quadrangle, Massachusetts (3)	103	5789
Fash, R. H., Discussion of geochemical exploration (7)	103	5828
Fearon, R. E., Well logging by radioactivity (5)	103	5815
Federal Works Agency, Tables of the exponential function e^x (9)	102	5707
—— Tables of sines and cosines for radian arguments (9)	103	5851
Fedotov, P. F., Prospecting at shallow depths by seismic methods (3)	102	5627
Fekete, Jenö, Improvements in or relating to electrostatic instruments for detecting seismic vibrations, British patent 509,783 (10)	100	5450
Ferchev, M., Contribution to the question of the applicability of the parameter "*PP*" in geophysical prospecting (4)	102	5662
Ferri, Francesco, The new magnetic map of Italy (isogonic lines referred to January 1, 1940) compiled by the Military Geographical Institute (2)	102	5614
Fisher, J. W., An experimental device for computing magnetic and gravitational anomalies (1, 2)	101	5456
Flerova, O. V., Investigation of a new oil-bearing region in the Amga River Basin in the Yakutsk S. S. R. (8)	102	5685
Floyd, F. M., Seismic surveying, U. S. patent 2,207,398 (10)	102	5733
Folland, Donald, Method and apparatus for geophysical prospecting, U. S. patent 2,190,323 (10)	101	5579
Fox, E. F., The geophysical and geological investigation of the Far East Rand (2)	103	5765

	No.	Abst.
Francis, C. F., Temperature gradients related to bottom-hole temperatures (6)	101	5534
French, C. A., Magnetic results 1927–37 (2)	103	5766
Fritsch, Volker, Radio propagation methods in applied geophysics (4)	100	5376
—— Contribution to the fundamentals of radio prospecting according to the so-called antenna compensation-capacity method (4)	100	5377
—— Prospects of applied geophysics in regions of former Czechoslovakia (7)	100	5399
—— Influence of geoelectric conditions at lightning discharges (4)	101	5512
—— The importance of geoelectric factors in testing lightning arresters (4)	103	5806
Fryxell, F. M., The earthquakes of 1934 and 1935 in northwestern Illinois and adjacent parts of Iowa (3)	103	5780
Funk, R. V., Apparatus for determining pressure and temperature in a well, U. S. patent 2,190,260 (10)	101	5575
—— Method of and apparatus for locating water leakages into wells, U. S. patent 2,184,338 (10)	103	5853

G

Gajdos, T., Electrical gravimeter (1)	103	5754
Galbraith, F. M., Geophysics in exploration at Falconbridge (2)	100	5317
Gamburtsev, G. A., Determination of the center of gravity of a perturbing body from gravity observations (1)	100	5301
—— On the possibility of separation of reflected transversal waves in seismic prospecting (3)	100	5337
—— On the theory of electromagnetic damping in induction seismographs (3)	100	5338
Gardner, L. W., An areal plan of mapping subsurface structure by refraction shooting (3)	100	5339
Garrigue, Hubert, Measurements of radioactivity and of temperature in the region of Lyngmarksbraeen (5)	100	5388
Gay, M. W., Relative gravity measurements, using precision pendulum equipment (1)	102	5605
Gennaro, Ida, Determining the relative gravity, as made in 1934, between the Royal Naval Hydrographic Institute in Genoa and the third-order station at the top of Montecastello (1)	103	5746
Geo-Frequenta Corporation, Method of determining the presence of oil, U. S. patent 2,190,320 (10)	101	5576
—— Method and apparatus for geophysical prospecting, U. S. patent 2,190,321 (10)	101	5577
—— Method of geophysical prospecting, U. S. patent 2,190,322 (10)	101	5578
—— Method and apparatus for geophysical prospecting, U. S. patent 2,190,323 (10)	101	5579
—— Method of geophysical prospecting, U. S. patent 2,190,324 (10)	101	5580
Geologische Rundschau, Atlantisheft (9)	100	5415
Geophysical Research Corporation, Seismic surveying, U. S. patent 2,184,313 (10)	101	5570
—— Seismic surveying, U. S. patent 2,192,972 (10)	101	5590
—— Seismic surveying, U. S. patent 2,192,973 (10)	101	5591
Gerling, E. K., On the emanation of radon from uranium minerals (5)	103	5818
Gibault, Gaston, Values of magnetic elements at the Chambon-la-Forêt (Loiret) Observatory on January 1, 1940 (2)	101	5467
—— The magnetic disturbance of March 24, 1940 (2)	103	5763
Gilbert, R. D., Interpretable method of electrical prospecting (4)	103	5807
Gilchrist, Lachlan, Use of mathematics in the delineation of magnetic and electric anomalies (7)	100	5400
Goodman, Clark, Radioactivity of sedimentary rocks and associated petroleum (5)	103	5813
Goos, F., Geiger-counter amplifier with high resolving power (5)	103	5814
Goudey, Raoul, Measurements of the intensity of gravity in France during 1939 (1)	101	5457
Green, W. G., Method for seismic prospecting, U. S. patent 2,203,140 (10)	102	5719
—— Well logging by radioactivity (5)	103	5815
Grenet, Georges, Universal vertical seismograph (3)	100	5340
Grimes-Graeme, R., How geophysics aids the geologist (7)	100	5405
Gulf Research & Development Co., Rock-sampling method, U. S. patent 2,140,097 (10)	100	5428

	No.	Abst.
Gutenberg, Beno, Tsunamis and earthquakes (3)	100	5341
—— New evidence for a change in physical conditions at depths near 100 km. (3)	100	5342
—— New evidence for a change in physical conditions at depths near 100 km. (3)	100	5343
—— On the development of seismic methods of prospecting (3)	100	5344
Gutmans, Marger, Contribution to the knowledge of the anomalies of magnetic intensities in central Brazil (2)	100	5318

H

Haalck, Hans, On determining the altitude in making gravity measurements (1)	101	5458
Hager, Dorsey, Fundamentals of the petroleum industry (9)	100	5416
—— Practical oil geology (9)	100	5417
Halbouty, M. T., Temperatures affecting crude-oil production (6)	100	5392
Halliburton Oil Well Cementing Co., Logging device, U. S. patent 2,156,052 (10)	100	5434
Hallimond, A. F., Magnetic observations on the Brockhill dyke (2)	101	5468
—— Magnetic survey of haematite ore in south Cumberland and Furness (2)	101	5469
—— Magnetic survey over hematite ore, Newton mine, Furness (2)	102	5616
Hamner, E. J., Amelia oil field, Jefferson County, Tex. (8)	100	5412
Harris, Sidon, Note on the change in frequency of the reflection from basement as this reflecting horizon increases in depth (3)	102	5628
Hart, R. C., Geophysics in exploration at Falconbridge (2)	100	5317
Haskell, N. A., Note on the change in frequency of the reflection from basement as this reflecting horizon increases in depth (3)	102	5628
—— The computation and mapping of seismic-reflection data (3)	102	5648
Hassler, G. L., Method of underground exploration, U. S. patent 2,197,453 (10)	102	5708
Hawley, P. F., Electrical logging of wells, U. S. patent 2,206,890 (10)	102	5725
—— Electrical logging of earth formations, U. S. patent 2,206,891 (10)	102	5726
—— Electrical logging of earth formations, U. S. patent 2,206,892 (10)	102	5727
—— Method and apparatus for logging wells, U. S. patent 2,206,893 (10)	102	5728
—— Two-well method of electrical logging and apparatus therefor, U. S. patent 2,183,565 (10)	103	5852
Hawthorn, D. G., Mechanical practicability of electrical logging while drilling (4)	100	5378
Hayakawa, Masami, The most suitable formula for gravity values in Tyosen, Japan (1)	100	5302
Hayes, R. C., Report for the year ending December 31, 1939 (3)	103	5781
Haynes, C. J., Well-logging electrode, U. S. patent 2,202,656 (10)	102	5717
Hayward, J. T., Method and apparatus for detecting oil in well drilling, U. S. patent 2,213,138 (10)	103	5869
Heck, E. T., Barium in Appalachian salt brines (7)	101	5539
Heck, N. H., The 3-hour-range index measuring geomagnetic activity (2)	100	5314
—— Geomagnetic 3-hour-range indices for the years 1938 and 1939 (2)	103	5756
Hée, Arlette, On a method of studying the radioactivity of rocks (5)	101	5529
Heiland, C. A., Magnetic methods (2)	100	5319
—— Multiple galvanometer, U. S. patent 2,183,934 (10)	101	5568
—— Method and apparatus for electrical prospecting, U. S. patent 2,189,377 (10)	101	5573
—— Equipment and laboratories, Department of Geophysics at "Mines" (8)	103	5834
—— Geophysical exploration (9)	103	5844
Heiland Research Corporation, Multiple galvanometer, U. S. patent 2,183,934 (10)	101	5568
—— Method and apparatus for electrical prospecting, U. S. patent 2,189,377 (10)	101	5573
Heinrich, R. R., Note on the *P*-curve of a South American deep-focus earthquake (3)	100	5345
